SHRI G.S INSTITUTE OF TECHNOLOGY AND SCIENCE, INDORE (M.P.)

(An Autonomous Institute)

Department of Civil Engineering & Applied Mechanics

DATE: - 01/09/23

ACTION TAKEN REPORT

S. N.	ALUMNI FEEDBACK(Comments)	ACTION TAKEN
1.	High score should be awarded to students because when it comes to competitive examination they give weightage to B tech marks.	We suggest for relative marking scheme to solve this issue. The proposal is with the Academic Council of the Institute.
2.	At least one technical visit per month.	Already taking place.
3.	More field visits suggested.	Already taking place.
4.	May add more Morden job oriented courses.	Discussed in the Board of Studies of the Department including Experts from filed and academic institute.
5.	Increase Industry- student interaction.	Already Taking Place in the form of internship and training.
6.	More practical work required in lab.	GATE Qualified M. Tech students and lab technician assigned in the respective lab to do the practical checking and viva of student along with faculty members.
7.	Excellent management and atmosphere.	Will improve upon the others' comments.
8.	The curriculum should have more of practical oriented programming.	Proposed a few joint undergraduate level projects with IT and computer science.
9.	Provide mandatory internship to M.Tech students.	Already Done as this is in our PG scheme.
10.	Topics must be added to meet the recent demands of industry.	Discussed in the Board of Studies of the Department including Experts from filed and academic institutes.
11.	Available for guiding the students in related topics.	Nice suggestion the Department will incorporate it from the next semester.
12.	When the placement time came our civil branch had only 1-2 company came in which also they asked so many validations so I can't sit there too so now I switched to IT working in Aliema Info Tech Start-up based company with low salary I got zero benefit of this college.	Taken this comment seriously. The main lacuna in the course does not have IT based courses. We plan to encourage the students to opt for Institute level optional subjects run by the CS, IT and other departments.
