

Action Taken Report

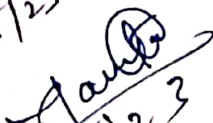

- During this academic year students were transitioning from online to offline mode so special attention was given to the continuous evaluation and identifying gaps in understanding of students through regular feedback in mentor mentee meetings. Due to which the overall feedback given by the students at the end of semester has improved. Some of the actions taken are listed below and discussed with faculties :-
 - On the basis of students feedback, the number of online tests and quizzes are increased along with the descriptive exam paper. For the coming semester when the intake will increase up to 200 students this will be helpful for continuous evaluation.
 - First year course CO10504 is changed according to NEP2020 and course content was also modified in the academic year 2022-23 which improved the course feedback. Moodle is introduced in this course to improve evaluation.
 - For fulfilling the prerequisites of the course CO 34881 Internet of Things a new course with name EC ____: Microprocessor and Microcontrollers will replace EC 24010: Analog and Digital Electronics which will have basic understanding of microcontroller programming and Internet of things.
 - In the seventh semester, to improve the quality of major projects Product Development and QA workshop will be added after approval from Board of studies and Academic council.
