1. Richard L. Daft, The New Era of Management ,Cengage Learning India Private Limited, 2012
2. Griffin Ricky W., Management Principles & Applications, Cengage Publications , 2012
3. Stoner James A.F., Management Principles & Applications, Pearson Education, 2003

MBA1007: ACCOUNTING FOR MANAGERS

COURSE OBJECTIVE: Objective of this course is to acquaint participants with the basic concepts of financial, management accounting and cost accounting.

COURSE CONTENTS:

- 1. Introduction to Accounting:** concept and conventions, accounting standards , journalizing the transactions, posting entries in ledger accounts, triple column cash book, preparation of trial balance, trading account, P&L account, balance sheet, adjustment entries, preparation of final accounts, bank reconciliation, depreciation,
- 2. Introduction to Cost Accounting:** Nature, role, scope, concept of cost centers and cost units, classification of cost by nature and behaviors, essentials while establishing a cost system, elements and managerial uses of unit cost, batch cost, job order costs, contract cost, process cost, joint product cost and by-product cost., preparation of cost sheet
- 3. Cost Management:** Understanding difference between cost reduction and control meaning, advantages and limitations of budgetary controls, types of budget, and preparation of budgets.
- 4. Cost Analysis for Decision Making and Standard Costing:** Make or buy decisions, accept or reject decisions, concept of standard costing, concept of variance, calculating material, labor and overhead variance.
- 5. Recent Developments:** Understanding basic difference between GAAP and IFRS, understanding concept and importance of (IA) inflation accounting and (HRA) human resources accounting, Calculation of IA and HRA , computerized accounting : features, creating ledgers & making voucher entries in accounting software package.

TEXT READINGS: LATEST EDITION

2. Avid W. Conklin, Cases in Environment of Business, Sage Response Book

MBA 1009: ORGANIZATION BEHAVIOUR

COURSE OBJECTIVE: Objective of this course is to enable students to comprehend Human Behavior in organizations so that they improve their managerial effectiveness on .

COURSE CONTENTS:

1. Foundations of Individual, Organizational and Group Behavior: OB Models, Personality: Determinants and Attributes, Values, Job Attitudes. Defining and Classifying Groups, Group Structure and Processes, Process of Group formation, Group Decision Making, Group v/s Team, Team Effectiveness, and Decision Making.

2. Learning, Perception and Motivation Learning and Learning Theories, Perception- Factors affecting Perception and Cognitive Dissonance theory. Motivation: Needs, Contents and Processes; Maslow's Hierarchy of Needs, Herzberg's Two Factor theory, ERG theory, Vroom's Expectancy theory, Reinforcement theory and Behavior Modification.

3. Leadership: Trait theories, Behavioral theories-- Ohio State Studies, Michigan Studies, and Managerial Grid. Contingency theories-- Fiedler's Model, Hersey and Blanchard's Situational leadership theory, Leader-Member Exchange theory, Path Goal theory, Charismatic Leadership.

4. Conflict and Negotiation: Intra-individual Conflict, Interpersonal Conflict, Intergroup Conflict, Organizational Conflict, Transitions in Conflict Thought, Functional versus Dysfunctional Conflict, Conflict Process, Conflict Management Techniques, Negotiation process , Bargaining strategies ,Global implications

5. Organizational Change , Stress Management and Organizational Cultures: forces of Change, Resistance to Change, and Lewin's Three-Step Model, Stress Management—Potential Sources, Consequences and Coping Strategies for Stress, Definition of culture, Uniform Cultures, Relevance of Culture, Creating and Sustaining Culture, How Employees Learn Culture.

TEXT READING: LATEST EDITION

1. Robbins, Judge , Sanghi —Organizational Behavior, Prentice Hall, New Delhi, 2009
2. K Aswathappa- Organizational Behavior,9th Edition, Himalaya Publications, 2012

SUGGESTED READINGS: LATEST EDITION

1. Newstorm and Davis- Organizational Behaviour, McGraw Hill; 11th Edition, 2004
2. Khanka -Organizational Behavior, S Chand & Co Ltd, 2006
3. Hitt, Miller and Colella- Organisation Behaviour , 3rd Edition, Wiley, 2010

MBA1010: OPERATIONS MANAGEMENT

COURSE OBJECTIVE: The objective of this course is to help the students understand the concepts of production function, inventory control, quality control, purchasing and materials management, and application of technical models and techniques for solving production problems.

COURSE CONTENTS:

- 1. Introduction to Production and Operations Management:** Nature of Production / Operations Management, Production Function and Its Environment, Functions of Production/Operations Manager, Organization of Production Function, Evolution of operation management, Types of Production Systems.
- 2. Facilities and Layout Planning:** Product Selection and Design, Service Design, Process and Technology Selection, Location of Manufacturing / Service Facility - Quantitative and Qualitative Models, Product layout, Process Layout, Fixed Position and Group Layout, layout design: Relationship based and Load-Distance cost matrix..
- 3. Resources Requirement Planning and Sequencing:** Capacity Planning, Machines and Labour Planning (Computations of Number of Machines and Workers) and Learning Curve Application. Introduction to PPC, Production Activity Control for Mass Manufacturing. Rules for Batch Processing, Sequencing and Job Shop - n-Jobs on Single Machine, n-Jobs on Two/Three Machines (Johnson's Rule).
- 4. Quality Control:** Quality Control Function, Acceptance Sampling (Single Sampling, Double Sampling and Multiple Sampling), Statistical Process Control, Operating Characteristics Curve and Its Applications (for Attributes and Variables), Application of Control Charts (C-chart, P-chart, X and R charts), Quality Circles, Quality Improvements, Introduction to Six Sigma Quality Concept and Its Role in Quality Management, Cost of Quality .
- 5. Materials Management:** Management in Relation to Materials: Meaning, Definition, Areas, Objectives, Importance, Role of Materials Manager, Integrated Materials Management, Materials Planning, Materials Identification, Codification and Standardization **Maintenance and Replacement Models:** Preventive and break down maintenance, Single Equipment Replacement Model and Group Replacement. Replacement of items which deteriorate with time and items which fails suddenly.

TEXT READINGS: LATEST EDITION

SUGGESTED READINGS: LATEST EDITION

1. Donald W. Dobler, Lamer Lee Jr. & David N. Burt, Purchasing & Materials Management, Tata Mc Graw Hill, New Delhi
2. B. Mahadevan , Operations Management, Himalaya publications, India

MAA 1104: MATHEMATICS AND STATISTICS FOR MANAGERS

COURSE OBJECTIVE: The objective of the course is to equip the students with the mathematical and statistical techniques and their application to business problems. The emphasis will be on the concepts and application rather than derivations.

COURSE CONTENTS:

- 1. Sets theory and probability:** Sets, Subsets, Types of Sets, Operations on Sets, Cartesian Product of Sets, Applications. Probability Theory: Concepts, Additive, Multiplicative, Conditional Probability Rules, Baye's Theorem
- 2. Determinants and Matrices with Business Application:** Types of Matrices, Operations on Matrices, Adjoint Matrix, Inverse Matrix, Elementary Row Operations. Solution of Simultaneous Linear Equations using Matrices, Input/ Output Analysis.
- 3. Introduction to Statistics:** Meaning and Definition of Statistics, Scope and Limitations of Statistics, Role of Statistics in Management Decisions, Measures of Central Tendency and Dispersion. Correlation and Regression
- 4. Probability Distributions:** Theoretical distributions - Binomial, Poisson and Normal Distributions. Their characteristics and applications.
- 5. Time Series and Statistical Decision Theory:** Time Series and Its Components, Analysis, Models of Time Series, Measurement of Trend, Seasonal Variations and Cyclic Variations. Introduction to Statistical Decision Theory, Decision Making Process, Decisions under Uncertainty and Risk, Decision tree.

TEXT READINGS: LATEST EDITION

1. J. N. Kapur and H. C. Saxena, Mathematical Statistics, S Chand and Company Ltd., 2013
2. Jayprakash Reddy and M. Reddy, A Text Book of Business Mathematics, Ashish Publishing House, 2004
3. K. B. Dutta, Matrix and Linear Algebra, Printice Hall of India, 2004

HUA 1105: BUSINESS COMMUNICATION

COURSE OBJECTIVES: The objectives of the course are to help the students acquire the basics of interpersonal communication and public speaking, so as to improve their communication skills and ability to understand others.

COURSE CONTENTS:

1. Basics of Communication: Defining Communication, Process of Communication, Objectives of Communication, Communication Model. Principles of Effective Communication, Difference between Business and General Communication, and Importance of Feedback. Introduction to Corporate Communication. Channels and Types of Communication: Verbal, Non-verbal, Formal, Informal, Internal, External and Communication Networks.

2. Factors Affecting Communication: Barriers to Effective Communication: Physical, Organizational, Psychological and Socio-cultural Barriers and ways to overcome them. Effective Listening: Importance of Listening. Types and Essentials of effective listening. Barriers to Effective Listening. Developing Listening Skills.

3. Interpersonal Communication: Understanding Communication through Transactional Analysis. Contemporary Trends: Technology enabled Communication, Online etiquettes, Cell phone etiquettes, Ethics in Business communication, Meeting Etiquettes.

4. Mechanism of Business Writing: Basic patterns of Business Letters. Approaches to writing- Direct, Indirect and Persuasive Styles. Cover Letters, Résumés, Applications, Sales and Credit Letters. Reports and Proposals, Drafting e-mails and Memos.

5. Presentation Strategies: Techniques of Oral Presentations, Defining the Purpose, Analyzing the Audience, Establishing the main idea, Selecting the Appropriate Channel and Medium. Public speaking. Communication approaches during Interviews. Group Discussions.

Practicals: Group Discussion Role plays. Case analyses, Presentation. Comprehension skills based on reading and listening using audio-visual media.

CTA 1106: IT FOR MANAGERS

COURSE OBJECTIVE: The objective of this course is to help students to understand the basics of Information Technology, Computer Hardware, Software, Applications, Databases, Internet and issues related to Design and Development of Information Systems.

COURSE CONTENTS:

1. Introduction to Computer: Hardware-input/ output devices; Software-System and application software, Computer Languages

2. Application Software

Word processing

Formatting (Index, Tab, bullet, numbering, etc.); Adding images, comments, symbols, diagrams

Adding header and footer, Changing Case, Text Direction, Rearranging Text into Columns; Mail Merge

Columns text (Tables, pictures, etc.); Importing and exporting data and files

Spreadsheets

Entering data (numeric, text, date, time, comments)

Editing (update values, copying, moving, drag & drop, delete / insert rows & columns)

Formatting (text style, text orientation, increase/decrease width of columns and rows)

Changing Chart and Data Series; Charts (bar, pie, line, etc)

Value Axis Scaling and Formatting Lines; Consolidating Data; Creating Automatic Subtotals.

Using Pivot Tables and Pivot Charts; 11.Using Analysis Tool – Goal Seek and Solver

Presentations

Creating presentations using Wizards

Creating blank presentation; Various type of views and their uses

Applying templates on presentations; Applying color schemes on presentations

Implementing Slide Transactions and Custom Animations; OLE Concepts

Database Creation

Creating tables (Understanding fields, data types, range etc.) ; Establishing relationships

Creating Tables using Wizard; Creating Tables using Data View

Creating Select Queries; Designing queries with QBE Grid

Creating other types of queries (Cross tab, update etc.); Creating forms using wizards and Toolbar

Inserting data in tables using forms; Validating Forms; Creating Reports for table data

3. E- Business Fundamentals and Electronic Payment System: E-Business Framework, E-Business Application, Network Infrastructure for E-Business. Implementation issues of E-Business, E-Business models. (B2B, B2C), Type of E-payment, Digital Token-Based E-payment, Smart Card, Credit Card Payment Systems, Risk on E-payment, Designing E-payment System, Role of Banking in Electronic Payment.

4. Inter-Organization Management and E-business Standards : EDI Application in Business, Standardization and EDI, EDI Software Implementation, VANs (Value Added Network), Internet Based EDI, Cyber Laws, Cyber Crimes and Frauds, Types and Tools of Hacking. Security and E-business: Client-server Security, Data and Message Security, Document Security, Firewalls.

5. Introduction to Information Systems and Future of Electronic-Business: Definition, Types of Information Processing Systems Transaction Processing Systems, Office Automation Systems, Knowledge Work Systems, Management Information Systems, Decision Support Systems, and Executive Support Systems, Mobile and Wireless Computing Fundamentals and Applications, Virtual Factory, Strategies for Electronic Business.

TEXT READING: LATEST EDITION

MBA 1903: GD/PI Lab

COURSE OBJECTIVE:

The objective of this course is to help students to develop soft skills and understand the basics of Communication. The course aims at enhancing oral and written expression ability of students. Analyze communication situations and audiences to make choices about the most effective and efficient way to communicate and deliver messages

- Deliver effective business presentations in contexts that may require either extemporaneous or impromptu oral presentations
- Provide feedback, accept feedback, and use feedback to improve communication skills
- Write business documents that are grammatically correct and use appropriate business style
- Develop effective interpersonal communication skills
- Use communication technology appropriately and effectively

COURSE CONTENTS:

1. **Reading Ability:** Reading of Management Literature, Business magazines and Newspaper. Analysing from managerial perspective. Summary/ Synopsis writing.
2. **Listening Ability:** Listening Business news and Speeches from business People. Analysing their views and writing summary and synopsis.
3. **Group Discussions:** Involvement of students in group discussions, awareness of current topics. Enhance their oral communication skills. Etiquettes of group discussion.
4. **Personal interview:** Conducting mock interviews to prepare students for placement. Personal Interview ethics and etiquettes.
5. **Presentation Skills:** Preparing a presentation using LCD. Integrating graphs, figures and Videos for effective presentation.
6. **Written Communication:** Students write letters, memos, proposals, formal and informal reports, work plans, email evaluation, and progress reports.

TEXT READING: LATEST EDITION

1. Courtland L. Bovee's ,Business Communication Today, tenth edition, 2010, Pearson.
2. Pushp Lata, Kumar, Sanjay. Communication or collapse, PHI
3. Kaul Asha, Effective Business Communication, PHI

MBA 1998: COMPREHENSIVE VIVA

COURSE OBJECTIVE:

The objective of comprehensive viva-voce is to judge the overall development of the student during the MBA Programme.

COURSE CONTENT:

The viva-voce shall normally cover all the subjects taught in the first semester of MBA Program

MBA 2008: HUMAN RESOURCE MANAGEMENT

COURSE OBJECTIVE:

The objective of this course is to help the students develop an understanding of the dimensions of the management of human resources, with particular reference to HRM policies and practices in India.

COURSE CONTENTS:

- 1. The Field of HRM:** An Overview of HRM, Concept, Functions of the HR department, Personnel to Human Resource shift, ASTD HRM Model, Structure of Human Resource Management, Role and Responsibilities of the Human Resource
- 2. Acquisition of Human Resources:** Objectives, Policies and Process of Human Resource Planning, Job Analysis, Job Description, Job Specification, Job Design (Nature , Job Characteristics, Reengineering Jobs, Advantages and Disadvantages, Consequences), Recruitment, Selection, Induction, Promotion and Transfer.
- 3. Human Resource Policies:** Administrative, Operational and Strategic Role of Human Resource, Formulation and Essentials of Sound Human Resource Policies, Concept of virtual organization , Flexi timings at work place. Case Studies
- 4. Development of Human Resources:** Concept of Training and Development, Evaluation of Training and Performance Appraisal (Appraising Individual and Team Performance), Introduction to Career and Succession Planning. Case Studies
- 5. Maintenance and Separation Processes:** Job Evaluation, Designing and Administering the Wage and Salary Structure, Compensation, Grievance Handling Procedure, Turnover, Retirement, Layoff, Retrenchment and Discharge, Mechanism of VRS, VRS in Public Sector and Private Sector. Case Studies

MBA2009 RESEARCH METHODOLOGY

COURSE OBJECTIVES: The objectives of the course are to equip the students with the concept and methods of Business Research. The students will be able to plan, design and carry out business research using scientific methods and prepare research report(s) / paper(s).

COURSE CONTENTS

Prerequisites: Student are suppose to have knowledge of Measures of Central Tendency, Measures of Dispersion, Simple Correlation and Regression Analysis. These concepts are taught to them in earlier semesters. **There will be no questions in examination from Prerequisites.**

- 1. Introduction to Research Methods:** Role and objectives of business research, types of research and various research design (exploratory, descriptive, experimental and diagnostic research), research process: Overview, Problems encountered by researcher. Experimental research design will comprise of Completely Randomized Design, Latin Square Design and Factorial Design.
- 2. Literature Review and Sampling:** Purpose of LR, LR methodology, Sources and Outcomes of LR. Theory and Design of Sample Survey, Census Vs Sample Enumerations, Objectives and Principles of Sampling, Types of Sampling, Sampling and Non-Sampling Errors
- 3. Data Collection and Questionnaire:** Collection, Organization, Presentation, Analysis and Interrelation of Primary and Secondary Data. Measurement in research, measurement scales, sources of errors in measurement, Techniques of developing measurement tools, classification and testing (reliability, verification and validity) scales, Designing questionnaires and interviews
- 4. Hypothesis testing and Data Analysis :** Parametric & Non-Parametric Tests, Testing and Interpretation sample tests for univariate and bivariate analysis using normal distribution, f-test, t-test, z-test, ANOVA, chi square test, Introduction and Applications of Multiple Regression, Factor Analysis, Cluster Analysis, Multidimensional Scaling, Discriminate, Canonical Analysis, Conjoint Analysis.
- 5. Interpretations and Report Writing:** Meaning of interpretation, techniques of Interpretation, precautions in interpretation, significance of report writing, steps in report writing, layout of report and precautions in writing research reports, Limitations of RM, Philosophical issues in Research, Ethics and Research.

Text Readings: LATEST EDITION

1. C. R. Kothari, "Research Methodology: Methods and techniques", Vishwa Prakashan, New Delhi
2. William G. Zikmund, "Business Research Methods", Dryden Press, Orlando.
3. Hair Anderson, Tatham and black, Multivariate data analysis, Pearson publications

Suggested Readings: LATEST EDITION

1. Asthana & Braj Bhushan, statics for social science, Prentice hall, India

MBA 2010: MARKETING MANAGEMENT

COURSE OBJECTIVE: The objective of this course is to provide the students exposure to modern marketing concepts, tools, and techniques, and help them develop abilities and skills required for the performance of marketing functions.

COURSE CONTENTS

1 Marketing Concepts: Customer Value and Satisfaction, Customer Delight, Conceptualizing Tasks and Philosophies of Marketing Management, Value Chain, Scanning the Marketing Environment, Marketing Mix Elements, Difference between Marketing and Selling, Marketing and Corporate Strategy.

2. Market Segmentation, Targeting, Positioning: Market Segmentations, Levels of Market Segmentations, Patterns, Procedures, Requirement for Effective Segmentation, Evaluating the Market Segments, Selecting the Market Segments, Differentiation, ways of differentiation, Tool for Competitive Differentiation, Developing a Positioning Strategy.

3. Product Decision: Objectives, Product Classification Product-Mix, Product Life Cycle Strategies, Product Diffusion Process, Equity, Challenges, Repositioning, Branding, Packaging, Introduction of Labeling. New Product Development Process. Pricing Decision: Pricing Objectives, Demand Estimating, Pricing Decision framework, Pricing Methods and Strategies, Pricing Practices, Internet and Transfer Pricing.

4. Distribution Decisions: Importance and Functions of Distribution Channel, Design of Distribution Channel, Management of Channels, Distribution Channel Members, VMS and HMS, Wholesaling, Retailing, Promotion Decisions: Effective Communication, Tools of IMC, Marketing Communication Process, Promotion mix, Direct and Indirect Marketing,

5. Emerging Trends in Marketing: An Introduction to Internet Marketing, Multi Level Marketing, Introduction of CRM, Importance of CRM, CRM Process. E-Marketing, Green Marketing, Event Marketing, Types of Events, Sponsorship, Cause Related Marketing, Concept of Rural Marketing, Global Marketing, Marketing for Non Profit Organizations

MBA2012 MANAGERIAL ECONOMICS

COURSE OBJECTIVE: Objective of this Subject is to help the students in establishing general principle behind managerial theories.

COURSE CONTENTS:

- 1. Introduction:** Nature and scope, characteristics and significance of managerial economics. Relationship of managerial economics with distinguishing disciplines, micro and macro economics and their interdependency, economic systems, central economic problems, production possibility curve, Incremental and marginal analysis. **Consumer Behaviour:** laws of demand and supply, determinants of demand and supply, demand analysis through utility analysis, law of DMU and EMU, consumer's equilibrium and its relations with price and income, indifference curve approach to consumer's equilibrium, elasticity of Demand and its various concepts, determinants and significance of demand elasticity.
- 2. Production:** Production function, Laws of return to variable proportions, Stages of production, Law of returns to scale, Producer's equilibrium and expansion path, Economies of scale. **Cost and profit:** Cost and its various concepts – economic; opportunity; private; and social costs, Cost function, Short run and long run costs, Cost interrelations, Break even analysis and its applications, Profit concepts and theories.
- 3. Pricings and markets:** Equilibrium price, Perfect competition, Monopoly, Monopolistic, and Oligopoly competition, Price discrimination, Kinked demand curve, Cartel formation, Price leadership.
- 4. National income and employment:** Concepts and measurement of national income, Money supply measures, Functions of money, Theories of value of money, Central and commercial banks and their functions.
- 5. Macro economics:** Business cycles, inflation – causes and effects, Philips curve, Monetary Policy, Fiscal Policy, monetary and fiscal measures of controlling inflation and unemployment. **Economics of development:** Economic development and economic growth, Factors of economic growth, Rostow's stages of economic growth, Keynesian theory and its application to underdeveloped countries.

MAA2102 QUANTITATIVE DECISION MAKING

COURSE OBJECTIVE:

The objectives of this course are to help the students acquire quantitative tools, and use these tools for the analysis and solution of business problems. The emphasis will be on the concepts and application rather than derivations.

COURSE CONTENTS:

1. Quantitative Techniques and Operations Research: Meaning, Scope of Quantitative Techniques and Operations Research in Management, Advantages and Limitations of Quantitative Techniques/Operation Research, Operation Research Process.

2. Linear Programming: Meaning of Linear programming, General Mathematical Formulation of LPP, Graphical Analysis, Solution of LPP: Simplex Method, Big-M Method, Advantage and limitations of LPP.

3. Transportation Model: Transportation Problem as a particular case of LPP Mathematical Formulation, Initial Basic Feasible Solution, Vogel's Approximation Method, Optimization (Minimization and Maximization) using Modified Distribution Method and Stepping Stone Method.

4. Waiting Line Models and Game Theory: Introduction, Scope in Management Decisions, Queuing Models – Single Server, Multi server with infinite capacity. Introduction to Games, Maximin and Minimax Principles, Pure and Mixed Strategies, Rule of dominance, Solutions of Games using –Algebraic and Graphical Methods, Game Theory and Linear Programming,

5. Markov Chain Analysis and Simulation: Computation of sequential probability of states for different periods, Steady State Probability of states and application of Markov Chain. Introduction to simulation, Monte Carlo Technique and its applications, single stage and multi stage simulation.

TEXT READING: LATEST EDITION

1. S. D. Sharma, “Operations Research”, Kedar Nath Ram Nath and Co. Meerut, India
2. Rathindra P Sen Operation Research, PHI publications, India
3. Winston, Wayne L., Operation Research applications and algorithms, Wadsworth Publishing Company Australia.

COURSE OBJECTIVES

The objectives of the course are to equip the students with the concept and methods of Business Research. The students will be able to plan, design and carry out business research using scientific methods and prepare research report(s) / paper(s).

COURSE CONTENTS

1. **Data pruning or missing data values:** Mean/Average/Frequency/Ratio/Mod Value/Null/Log Function/ Recoding and decoding of variables in case change of language in the questionnaire.
2. **Reliability tests:** Cronbach alpha /Guttman/Split-half/Parallel tests/ Durbin–Watson statistic.
3. **Validity:** : Content/Face/Discriminant/Convergent/Divergent validity, KMO Barlett test/Anderson rubin/determinants/rotation of matrix (orthogonal/varimax/equamax).
4. **Tests:** Parametric tests and non parametric tests, Factor analysis/Correspondence analysis/ Optimal scaling/ ANOVA/MANOVA tests.
5. **Higher order tests to check or perform impact analysis :** Regression (linear/mediation/moderation), Simple Regression/Multiple regression, Partial least square modeling (more than onedegree: multi level mediation and moderation).

MBA 2903: EXCEL LAB

COURSE OBJECTIVE:

The objective of this course is to help students to develop application of computing skills for Quantitative Decision Making.

COURSE CONTENTS:

1.Transportation Model: Solving Complex Transportation and Assignment model problems of all types and constraints using excel.

2.Linear Programming Model: Application of excel in solving multivariable linear programming problems of maximization and minimization.

3.Integer Programming: Solving Integer linear programmes using excel.

4.LINGO/ TORA: Application of the softwares for Queuing Model, Inventory Model

5.Finance Function: Computation of various capital budgeting methods using excel. It includes NPV, IRR, Annuity etc..

MBA 2998: COMPREHENSIVE VIVA

COURSE OBJECTIVE:

The objective of comprehensive viva-voce is to judge the overall development of the student during the MBA Programme.

EXAMINATION SCHEME:

Every student will be required to undergo comprehensive viva-voce at the end of first semester of MBA. A panel of examiners will conduct the comprehensive viva-voce examination. Comprehensive viva-voce will be of four virtual credits. The panel will award credit to the students.

COURSE CONTENT:

The viva-voce shall normally cover all the subjects taught in the first semester of MBA Program

						THEORY		PRACTICAL		TOTAL MARKS
T	P	Tu	CW	SW	Tu	CW	End Sem	SW	End Sem	
4	-	-	3	-	-	30	70	-	-	100

COURSE OBJECTIVE: The course is design to equip the students with the modern concepts of Business Analytics. The emphasis will be on the application of data processing to take management related decisions including problem solving and making effective predictions accurately.

COURSE OUTCOMES: At the end of the course, the student will be able to:

1. Understand use of business analytics to formulate and solve business problems and to support managerial decision making.
2. Understand tools and use data for accurate predictions.
3. Use and apply Excel, Excel add-ins, SPSS and R to solve business problems.
4. Understand prescriptive analytics for advanced optimization and understand machine learning.

COURSE ASSESSMENT:

Students will be assessed on the basis of following -

1. Continuous assessment in the form of two mid-term tests, class attendance- regularity, quiz, and assignments/presentations (30%)
2. An end-term theory examination (70%).

MBA3005: BUSINESS ANALYTICS

COURSE CONTENTS:

- 1. Introduction, Scope and Application:** Introduction, Evolution, Classification, Trends, Scope and data for Business Analytics. Application of Business Analytics in various aspects of management. Exploring data and analytics on spreadsheets. Data mining, its introduction, phases, comparison with classical statistics
- 2. Descriptive and Inferential Analytics:** Data visualization, Data charts and graphs. Measures of location, dispersion and shape. Descriptive statistic for grouped and categorical data. Statistical inference, power of test, confidence intervals. Categorical Data Analysis, Goodness of fit.
- 3. Predictive and Analytics:** Linear, Non Linear and multiple regression, multicollinearity, heteroscedasticity, Autocorrelation, dummy variable and categorical variable regression modeling, autoregressive modeling, Logistic regression, Holt Walter time series forecasting with seasonality. Adjusted R^2 .
- 4. Machine Learning:** Data preparation, variable conversion, Performance matrix, Data reduction techniques, missing data, overlapping data, over fitting, outliers, data normalization, types of data, data partitioning, multidimensional visualization, Principle Component Analysis, Classification and misclassification, Introduction to k-NN, Naïve Bias, pruning, Classification and Regression Trees, Artificial Neural Networks. Discriminate Analysis.
- 5. Prescriptive Analytics:** LPP, Integer Programming, Sensitivity, applications in management, excel solver, Conditions for Optimality, Infeasibility, Degeneracy & Multiple Solution, decision models, Monte Carlo simulation and risk analysis.

TEXT READINGS: LATEST EDITION

2. Hodeghatta and Nayak, Busines Analytics using R, Apress.
3. Laursen and Thorlund, Business Analytics for Managers 2e, Wiley, 2017.

MBA 3996: SUMMER TRAINING

COURSE OBJECTIVE:

The objective of Summer Training is to help students gain an understanding of practical industrial concepts.

EXAMINATION SCHEME:

Every student will be required to undergo summer training at the end of second semester of MBA. A student is required to do a summer project on any aspect of Business Management in the industry for eight to ten weeks at the end of the first year i.e., 2nd Semester (April - June) . A panel of examiners will conduct the presentation during third semester. The panel will be appointed by the head of department. Summer training will be of two credits. The panel will award credit to the students.

COURSE CONTENT:

The PPT and viva-voce of summer training shall normally cover the work done by the student during the interns. Student has to submit the project report in the number and format decided by the department.

MBA 3999: COMPREHENSIVE VIVA

COURSE OBJECTIVE:

The objective of comprehensive viva-voce is to judge the overall development of the student during the MBA Programme.

EXAMINATION SCHEME:

Every student will be required to undergo comprehensive viva-voce at the end of third semester of MBA. A panel of examiners will conduct the comprehensive viva-voce examination. The panel will be appointed by the head of department. Comprehensive viva-voce will be of four virtual credits. The panel will award credit to the students.

COURSE CONTENT:

The viva-voce shall normally cover the subjects taught in all the semesters of MBA Program

MBA 3107: STRATEGIC BRAND MANAGEMENT

PERIOD PER WEEK			CREDITS			MAXIMUM MARKS				
						THEORY		PRACTICAL		TOTAL MARKS
T	P	Tu	CW	SW	Tu	CW	End Sem	SW	End Sem	
4	-	-	3	-	-	30	70	-	-	100

COURSE OBJECTIVE:

The objective of this course is to provide students an understanding of fundamental concepts and importance of Branding and its application in Brand Management in different business scenario. It includes the process and the steps needed under Brand Management.

COURSE OUTCOMES:

At the end of the course, the student will be able to:

1. Understand the basic fundamentals and importance of the brand
2. Understand and apply the concepts of Brand Positioning and Repositioning.
3. Locate Brand elements and sketch marketing programs. They will also be able to implement concepts like Brand Mapping.
4. Discuss Brand Value Chain, Brand equity management system, Managing Brands over Time, Managing Brands over Geographic Boundaries They shall also be able to identify Brand Hierarchy.

COURSE ASSESSMENT:

Students will be assessed on the basis of following-

1. Continuous assessment in the form of two mid-term tests, class attendance- regularity, quiz, and assignments/presentations (30%)
2. An end-term theory examination (70%).

MBA 3107: STRATEGIC BRAND MANAGEMENT

COURSE CONTENTS:

- 1. Brands and Brand Management:** The concept of Brand, Importance and Significance of Branding, Challenges and Opportunities, Brand Health, Brand Awareness, Brand Image, Brand Personality, Brand Association. The Positioning Decisions, Brand Identity, Brand Loyalty, Brand Evolution, Brand Equity Concept, The Role of Brands, Strategic Brand Management Process, Legal Perspectives of Branding, Brand Positioning and Repositioning, Brand Valuation, Service Brands, and Global Branding.
- 2. Identifying and Establishing Brand Positioning and Values:** Overview of Strategies, Customer Based Equity, Making a Brand Strong: Brand Knowledge, Sources of Brand Equity, Building Strong Brands, Brand Building Implications, Identifying and Establishing Brand Positioning, Defining and Establishing Brand Values.
- 3. Planning and Implementing Brand Marketing Programs:** Criteria for Choosing Brand elements, Options and Tactics for Brand Elements, Designing Marketing Programs to Build Brand Equity, Integrating Marketing Communications to Build Brand Equity, Leveraging Secondary Brand Knowledge to Build Brand Equity.
- 4. Measuring and Interpreting Brand Performance:** Developing a Brand Equity Measurement and Management System, Brand Value Chain, Designing Brand Tracking Studies, Establishing a Brand Equity Management System, Measuring Sources of Brand Equity: Capturing Customer Mindset, Measuring Outcomes of Brand Equity: Capturing Market Performance
- 5. Growing and Sustaining Brand Equity:** Designing and Implementing Branding Strategies, Introduction and Naming New Products and Brand Extensions, Managing Brands over Time, Managing Brands over Geographic Boundaries and Market Segments, BCG Product - Portfolio Matrix.

MBA 3704: OPERATIONS PLANNING AND CONTROL

PERIOD PER WEEK			CREDITS			MAXIMUM MARKS				
						THEORY		PRACTICAL		TOTAL MARKS
T	P	Tu	CW	SW	Tu	CW	End Sem	SW	End Sem	
4	-	-	3	-	-	30	70	-	-	100

COURSE OBJECTIVES: The course is design to equip the students with the concepts of Operations Planning and Control (OPC). The emphasis will be on the application of concepts and tools used in OPC for achieving efficiency and quality superiority.

COURSE OUTCOMES:

At the end of the semester, the students will be able to:

1. To acquire an understanding of the basic functions and fundamentals of operations planning and control.
2. To develop analysing skills in solving production management problems such as design of efficient plant location and layout, aggregate planning and master scheduling.
3. To comprehend the significance of production planning and control and demand forecasting.
4. To demonstrate an understanding of the concepts of materials management such as MRP, inventory control and stores management.

COURSE ASSESSMENT:

Students will be assessed on the basis of following-

1. Continuous assessment in the form of two mid-term tests, class attendance- regularity, quiz, and assignments/presentations (30%)
2. An end-term theory examination (70%).

MBA 3704: OPERATIONS PLANNING AND CONTROL

COURSE CONTENTS:

- 1. Introduction to Production System Management:** Production Defined, Production System its selection. Factors of Production, Production Function, Production Problem Areas, Production Decisions, Boundaries of Production System, Size of Plants.
- 2. Introduction to Operations planning and Control:** Need for OPC, Impact of OPC, Advantages, Limitations, and functions of Operations Planning Control, System Point of view, Duties of Production Controller, Principles and Procedure of Production Control Methods and techniques of Production Control.
- 3. Sales Forecasting:** Introduction, Definition, and Methods of Demand Forecasting, Long-term Sales Forecasting. Linear and Quadratic forecasting. Exponential Smoothing. Master Production Schedule, ATP (Available to Promise).
- 4. Routing and Sequencing: Routing:** Definition, Objectives, and Procedure of Routing, Factors Affecting Routing Procedure, Route Sheets, and Use of Route Sheets. Sequencing definition, Classification of Sequencing methods. Sequencing for more than three machines. Single Machine Sequencing, Algorithms and methods.
- 5. Scheduling and Dispatching:** Definition Aims of Scheduling, Purpose of Scheduling, Types of Scheduling Situations, Short-term Scheduling, Long-term Scheduling, Methods of Scheduling. Scheduling through Networks, Line of Balance, Line Balancing Methods. Duties of Dispatcher, Dispatching procedures, Types of Follow-up, Preventing Production Delays, Causes for Delay.

MBA 3705: BUSINESS PROCESS REENGINEERING

PERIOD PER WEEK			CREDITS			MAXIMUM MARKS				
						THEORY		PRACTICAL		TOTAL MARKS
T	P	Tu	CW	SW	Tu	CW	End Sem	SW	End Sem	
4	-	-	3	-	-	30	70	-	-	100

COURSE OBJECTIVE: The objective of this course is to acquaint the student with understanding process orientation in business management and develop skills and abilities in re-engineering and business process for optimum performance.

COURSE OUTCOMES: At the end of the semester, the students will be able:

1. To understand the basic fundamentals (Philosophy, Need, Benefits, and Pitfalls) of Business Process Engineering (BPR).
2. To comprehend the organizing, strategic, and operational issues in BPR.
3. To analyse and apply various models in BPR such as the Five-step model, ARTEMIS model.
4. To explore the significance of issues influential in implementing BPR.

COURSE ASSESSMENT:

Students will be assessed on the basis of following-

1. Continuous assessment in the form of two mid-term tests, class attendance- regularity, quiz, and assignments/presentations (30%)
2. An end-term theory examination (70%).

MBA 3705: BUSINESS PROCESS REENGINEERING

COURSE CONTENTS:

- 1. Introduction to BPR:** Business Process Re-Engineering (BPR), Philosophy of BPR, Fundamental Tenets of BPR, Benefits and Pitfalls of BPR, Drivers to BPR. Significance and functions of BPR.
- 2. Process Re-engineering Framework:** Opportunity Assessment, Planning the Process Re-engineering Project. Organizing for Process Re-engineering. Strategic and operational issues in BPR.
- 3. Process Analysis and Design,** ARTEMIS model, Five-step model. IT enabled BPR. Simulation and workflow diagram as application for BPR.
- 4. Planning and Implementing the Transition:** Planning the Transition, Implementing the Transition, Tracking and Measuring Process Performance. Change Management Tools
- 5. Risk and Impact Measurement,** Innovations and Benchmarking, BPR v/s Industrial engineering. BPR v/s Automation, Role of TQM in BPR. Case studies

MBA 3706: MATERIALS MANAGEMENT

PERIOD PER WEEK			CREDITS			MAXIMUM MARKS				
						THEORY		PRACTICAL		TOTAL MARKS
T	P	Tu	CW	SW	Tu	CW	End Sem	SW	End Sem	
4	-	-	3	-	-	30	70	-	-	100

COURSE OBJECTIVE: Objective of this course is provide the students exposure to the advanced concepts of Materials Management, and issues like selective inventory control, procurement, e - procurement, Vendor rating, Designing Materials purchase, inventory and waste management policies.

COURSE OUTCOMES:

At the end of the semester, the students will be able to:

1. Comprehend the basic fundamentals and significance of materials management in modern era.
2. Integrate the organization wide materials requirement to develop an overall plan (MRP).
3. Identify, study, compare, and evaluate alternatives, select and relate with a good supplier.
4. Apply various purchasing method and inventory controlling techniques into practice as well as integrate important materials functions including stores management.

COURSE ASSESSMENT:

Students will be assessed on the basis of following-

1. Continuous assessment in the form of two mid-term tests, class attendance- regularity, quiz, and assignments/presentations (30%)
2. An end-term theory examination (70%).

MBA 3706: MATERIALS MANAGEMENT

COURSE CONTENTS:

- 1. Introduction:** introduction to Materials Management and Productivity, Functions of materials management, Organization structures in materials management, role of materials management techniques in improved material productivity. Materials Planning: Objectives, Material requirement planning, manufacturing resource planning, JIT production planning, Strategic materials planning, Material control: Acceptance Sampling, Inspection.
- 2. Purchasing:** Importance of good purchasing system, Organization of purchasing functions, Purchase policy and procedures, Responsibility and limitations, Purchasing decisions, Role of purchase in new product development, Role of purchasing in cost reduction, Negotiations and purchase, Purchasing research: Identification of right sources of supply, Vendor rating, Standardization, Vendor certification plans, Vendor and supply reliability, Developing new source of supply.
- 3. Cost reduction:** Cost control v/s cost reduction, Price analysis, Material cost reduction techniques, Variety reduction, Cost reduction and value improvement, Techniques of cost control, Standard costing, Cost effectiveness, Cost analysis for material management, Material flow cost control. Make or buy decision, Economic analysis, Break even analysis, Break-even point theory, whether to add or drop a product line
- 4. Inventory management:** Inventory v/s Stores, Types of inventory, Inventory control, EOQ model, Various inventory models, Inventory models with quantity discount, Exchange curve concept, Coverage analysis, Optimal stocking and issuing policies, Inventory management of perishable commodities, Selective inventory control (ABC, VED analysis, FSN, HML, XYZ, GOLF, Music 3D), Design of inventory distribution systems, Information system for inventory management,
- 5. Stores and waste management:** Design of Stores for manufacturing organisation and retail stores, Centralisation v/s Decentralisation, Types of stores, Waste Reduction, and waste disposal system planning. Case studies.

TEXT READINGS: LATEST EDITION

2. W.R.Stelzer Jr. Materials Management, PHI

MBA 3707: TOTAL QUALITY MANAGEMENT

PERIOD PER WEEK			CREDITS			MAXIMUM MARKS				
						THEORY		PRACTICAL		TOTAL MARKS
T	P	Tu	CW	SW	Tu	CW	End Sem	SW	End Sem	
4	-	-	3	-	-	30	70	-	-	100

COURSE OBJECTIVE: The objective of the course is to acquaint the students of improving quality of products and services, the modern approaches of Quality Enhancement and Quality Gurus. The course also aims at learning of Six sigma quality.

COURSE OUTCOMES:

At the end of the semester, the students will be able to:

1. Gain basic knowledge in Total Quality Management (TQM) relevant to both manufacturing and service industry.
2. Evaluate the principles of quality management and to explain how these principles can be applied within quality management systems.
3. Identify and apply the tools and techniques of quality management to manufacturing and services processes.
4. Identify and evaluate the measures to overcome various quality issues.

COURSE ASSESSMENT:

Students will be assessed on the basis of following-

1. Continuous assessment in the form of two mid-term tests, class attendance- regularity, quiz, and assignments/presentations (30%)
2. An end-term theory examination (70%).

MBA 3707: TOTAL QUALITY MANAGEMENT

COURSE CONTENTS:

- 1. Core Concepts of Total Quality Management:** Customer Focus, Quality for Profits Cost of Quality, Competitive Benchmarking, Team Efforts, Managers as Role Models, Recognition and Rewards, Quality Delivery Process.
- 2. TQM Fundamentals:** Evolution of Total Quality Management. Historical perspective. Elements of TQM: Elimination of waste and problem exposure. Total quality control systems. Quality Function Deployment. Learning from Quality Gurus: Edward Deming, Joseph M. Juran, Karon Ishikawa, Philip B. Crosby, William E. Conway and their Applications in Today's Business Environment.
- 3. Tools and Techniques of TQM:** Techniques for Analyzing a Quality Process, Quality Circles, Statistical Process Control, Failure Mode and Effect Analysis, Fishbone Diagram, Computer Aided Inspection, Data Collection and Analysis. Poka Yoke, Ishikawa Diagram.
- 4. Quality Standards, applications of TQM:** ISO-9000; ISO-16000: Concepts, Certifications, Methods and Implementations. Applications of TQM to service organizations. Various Quality Awards. Cost-benefit analysis. Life cycle costing. Case studies.
- 5. Fundamental concepts of Six sigma,** General methodology of Six Sigma. Latest developments in six sigma methodology, six-sigma and cost control, generating competitive advantage and quality superiority for the firm. Indian Applications. Pitfalls and difficulties in implementation of TQM and Methods of Avoiding pitfalls in implementation.

4	-	-	3	-	-	30	70	-	-	100

COURSE OBJECTIVE: The objective is to emphasize importance of Innovations and its management. It also highlights the importance of sustained growth and role of innovation in achieving sustainability.

COURSE OUTCOMES:

At the end of the semester, the students will be able to:

1. Understand and assess the importance of innovation in business practices.
2. Identify the major factors for success of innovation as well as bottlenecks in adopting innovative culture.
3. Evaluate the impact of innovation and sustainability on society, nation and its economy.
4. Elaborate the factors, issues, and challenges in adopting sustainability practices in business scenario.

COURSE ASSESSMENT:

Students will be assessed on the basis of following-

1. Continuous assessment in the form of two mid-term tests, class attendance- regularity, quiz, and assignments/presentations (30%)
2. An end-term theory examination (70%).

MB _____ : INNOVATION MANAGEMENT AND SUSTAINABILITY

COURSE CONTENTS:

- 1. Introduction:** Definition of Innovation, importance. Evaluating innovation challenges. Degree of challenges.
- 2. Types of innovation:** Product innovation, Process innovation, Strategy innovation, Market Innovation, Financial innovation, Corporate innovation. Process of innovations: Staging Phase, Aligning Phase, Exploring Phase, Creating Phase, Mapping phase.
- 3. Innovation Performance:** Factors for success of innovation, examples of successful innovation. Technology as a driver for innovation. Macro aspects: Impact of innovation on society, nation and its economy, and global impact.
- 4. Sustainable Development:** Sustainability through Innovation. From Malthus to sustainable development. Challenges of sustainable development, Global Environmental issues. Sustainability indicators. Legislative and multilateral agreements.
- 5. Sustainability Issues:** Externalities, valuation, social costs and dimensions, Natural resource accounting, International cooperation, crisis, conflict and compromise in sustainable development, Citizen participation. Case Studies: Innovative business practices, management approaches, and models for Corporate social responsibility and sustainability in Indian context.

MBA SECOND YEAR- FOURTH SEMESTER

SUBJECT CODE	LIST OF SUBJECTS
---------------------	-------------------------

COMPULSORY SUBJECTS:

MBA 4005	<u>PROJECT MANAGEMENT</u>
MBA 4998	<u>MAJOR RESEARCH PROJECT (Phase-II)</u>
MBA 4999	<u>COMPREHENSIVE VIVA</u>

MARKETING:

MBA 4108	<u>CONSUMER BEHAVIOUR</u>
MBA4109	<u>RURAL & SERVICE MARKETING</u>
MBA 4106	<u>INTERNATIONAL MARKETING</u>
MBA 4100	<u>SUPPLY CHAIN MANAGEMENT</u>
	<u>INDUSTRIAL MARKETING</u>

FINANCE:

MBA 4304	<u>INTERNATIONAL FINANCE</u>
MBA 4305	<u>CORPORATE STRUCTURE FINANCING</u>
MBA 4306	<u>BANKING AND INSURANCE</u>
	<u>FINANCIAL MODELLING USING EXCEL</u>
	<u>MERGERS AND ACQUISITIONS</u>

HUMAN RESOURCE:

MBA 4504	<u>COMPENSATION AND REWARD MANAGEMENT</u>
MBA 4505	<u>HR STRATEGIES AND AUDIT</u>
MBA 4506	<u>LABOR LEGISLATIONS</u>
	<u>BUSINESS PROCESS TRANSFORMATION</u>
	<u>SOCIAL SECURITY AND LABOR WELFARE</u>

OPERATIONS:

MBA 4100	<u>SUPPLY CHAIN MANAGEMENT</u>
MBA 4705	<u>LOGISTICS MANAGEMENT</u>
MBA 4706	<u>ADVANCES IN OPERATIONS MANAGEMENT</u>
	<u>TECHNOLOGY MANAGEMENT</u>
	<u>ENTERPRISE RESOURCE PLANNING</u>

MBA 4005 PROJECT MANAGEMENT

PERIOD PER WEEK			CREDITS			MAXIMUM MARKS				
						THEORY		PRACTICAL		TOTAL MARKS
T	P	Tu	CW	SW	Tu	CW	End Sem	SW	End Sem	
4	-	-	3	-	-	30	70	-	-	100

COURSE OBJECTIVE: The objective of the course is to acquaint students with project management method and to develop skills on project planning, analysis, implementation and control.

COURSE OUTCOMES: At the end of the semester, the students will be able to:

1. Understand concept of Project Management, its application in management of organization in present world scenario. To be able to manage project teams during project life cycle.
2. Assess feasibility of projects with regard to market, finance and socio-economy and determine project cash flows and check feasibility.
3. Identify, evaluate and compare various sources of risk in projects, as well as techniques to reduce risk and its impact.
4. Monitor project using network analysis for both PERT and CPM and perform project cost optimization and resource utilization.

COURSE ASSESSMENT:

Students will be assessed on the basis of following-

1. Continuous assessment in the form of two mid-term tests, class attendance- regularity, quiz, and assignments/presentations (30%)
2. An end-term theory examination (70%).

MBA 4005 PROJECT MANAGEMENT

COURSE CONTENTS:

1. **Project Planning:** Characteristics, Need, Objectives and Project Life Cycle. Types of Projects, Project selection tools, Market Potential Analysis, and portfolio planning tools (BCG, SPACE and their interface). Types of Project Organizations and Human Aspects of Project Management, Traits of project manager
2. **Technical and Financial Feasibility:** Technical Analysis (technology selection, capacity selection) Cost of Project, and financing, Project Cash Flows (including projects and owner's perspective), Optimum capital structuring of a project for a given risk, Project Appraisal Criteria.
3. **Risk Analysis and SCBA:** Analysis of Risk. Risk Adjusted Capital Budgeting, Sensitivity Analysis, Scenario Analysis, Hiller Model, Optimum DSCR and BEP, Social Cost Benefit Analysis.
4. **Project Networks:** Basic Concepts of Networks, Construction of network on AOA and AON. Line Estimation and Determination of Critical Path (for both PERT and CPM Models), Slacks, Floats, and applications.
5. **Cost Time Relationship and Project Monitoring:** Crashing and Reverse Crashing with their significance. Resource leveling, Earned Value Approach Performance Evaluation, Abandonment Analysis, Project Audit.

TEXT READINGS: LATEST EDITION

SUGGESTED READINGS: LATEST EDITION

1. Meredith and Mantel, Project management: a managerial approach, 8e, Wiley India, New Delhi, 2012.
2. Vasant Desai, Project Management, New Delhi: Himalaya Publishing House, 2008.

MBA 4998: MAJOR RESEARCH PROJECT

COURSE OBJECTIVE:

The objective of Major Research Project is to enable the student to go into the detail of the given problem and design an effective solution keeping the given constraints and organizational objectives in mind. This is to enhance the analytical and problem solving ability of the student.

EXAMINATION SCHEME:

Major Research Project will be compulsory. Before the end of IV semesters for MBA, the student will be required to submit the final MRP Report in the hard bound form in the number specified by the department. All the students are required to give a presentation of his/her work done during the project before the exam panel. Major Research Project (MRP) will be of Two (2) credits. A panel of examiners will award credits.

MBA 4999: COMPREHENSIVE VIVA

COURSE OBJECTIVE:

The objective of comprehensive viva-voce is to judge the over all development of the student during the MBA Programme.

EXAMINATION SCHEME:

Every student will be required to undergo comprehensive viva-voce at the end of fourth semester of MBA. A panel of examiners will conduct the comprehensive viva-voce examination. The panel will be appointed by the head of department. Comprehensive viva-voce will be of four virtual credits. The panel will award credit to the students.

COURSE CONTENT:

The viva-voce shall normally cover the subjects taught in all the semesters of MBA Program

MBA 4108: CONSUMER BEHAVIOR

PERIOD PER WEEK			CREDITS			MAXIMUM MARKS				
						THEORY		PRACTICAL		TOTAL MARKS
T	P	Tu	CW	SW	Tu	CW	End Sem	SW	End Sem	
4	-	-	3	-	-	30	70	-	-	100

COURSE OBJECTIVE: The objective of this course is to help students gain an understanding of Consumer Behavior and its applications.

COURSE OUTCOMES:

At the completion of this course, the students will be able to:

1. Understand Nature of consumer behavior and Environmental Influences and its impact on Consumer Behavior
2. Discuss influence and importance of Family, culture and opinion leadership.
3. Explain concepts of motivation and attitude and its influence on consumer.
4. Describe consumer decision process, CRM and consumer research.

COURSE ASSESSMENT:

Students will be assessed on the basis of following-

1. Continuous assessment in the form of two mid-term tests, class attendance- regularity, quiz, and assignments/presentations (30%)
2. An end-term theory examination (70%).

MBA 4108: CONSUMER BEHAVIOR

COURSE CONTENTS:

- 1. Introduction to the Study of Consumer Behavior:** Nature of consumer behaviour, Scope and Application of consumer behaviour. Environmental Influences and impact on Consumer Behavior: Cultural, Social, Personal, Family and Situational Influence on consumer behaviour, application of consumer behaviour,
- 2. Opinion Leadership and Life Style Marketing:** Characteristic of Culture, Cross Cultural Understanding, Nature of Social Class and Consumer Behaviour, Nature, Significance and marketing Implications of Personal Influence, Significance of Family in Consumer Behaviour and Family Life Cycle, Opinion Leadership Forms.
- 3. Consumer as an Individual:** Involvement and Motivation, Knowledge, Attitude, Values, Personality, Learning and Life Style, Nature & role of Motive, Classifying Motive, Characteristics, Functions & Sources of Attitudes, Attitude Theory & Model, Characteristics and Classification of Learning, Personality Theory and Application, Psychographics.
- 4. Consumer Decision Processes:** a. Pre-purchase Process: Information Processing. b. Purchase Processes: Consumer Decision Rules. c. Post Purchase Processes: Framework, Dissonance Satisfaction / Dissatisfaction. Consumer Behaviour Models: a. Nicosia Model. b. Howard Sheth Model. c. Engel-Blackwell and Miniard Model, d. Sheth Family Decision Making Model.
- 5. CRM:** CRM and Consumer Behavior, Consumer Roles, Market Values and CRM. Case study related to consumer behavior. Consumer Research, Various methods and techniques of consumer research, reliability and validity, generalization. New Developments in the field of Consumer Research

TEXT READINGS: LATEST EDITION

1. Leon G. Schiffman and Lustic Lazar Kanuk, Consumer Behaviour, London, Prentice Hall, 11th Edition, 2014
2. William L. Wilkie, Consumer Behaviour, New York, John Wiley and Sons, 3rd Edition, 1994.

SUGGESTED READINGS: LATEST EDITION

MBA 4109: RURAL AND SERVICE MARKETING

PERIOD PER WEEK			CREDITS			MAXIMUM MARKS				
						THEORY		PRACTICAL		TOTAL MARKS
T	P	Tu	CW	SW	Tu	CW	End Sem	SW	End Sem	
4	-	-	3	-	-	30	70	-	-	100

COURSE OBJECTIVES -

The objectives of this course are to expose the students to various aspects of services and also give them a glance into the rural markets which can help them in developing a deep insight to the domain of services and to the behavior of rural consumers.

COURSE OUTCOMES: At the completion of this course, the students will be able to:

1. Understand the importance of rural marketing in current scenario and environment of rural marketing.
2. Discuss on Psychology of Rural Consumers and the Marketing Strategies in its context.
3. Explain service quality, challenges in service marketing and dimensions of service marketing strategies.
4. Describe about importance of innovation in service and rural marketing and will identify different marketing plans for different products depending on the product attributes and the target customers.

COURSE ASSESSMENT:

Students will be assessed on the basis of following-

1. Continuous assessment in the form of two mid-term tests, class attendance- regularity, quiz, and assignments/presentations (30%)
2. An end-term theory examination (70%).

MBA 4109: RURAL AND SERVICE MARKETING

COURSE CONTENTS:

- 1. Rural Marketing Scenario:** Concept, definition, importance, nature and scope of rural marketing. Problems in Rural Marketing Rural Market Structure: Demographic Environment, Physical Environment, Socio Environment, Economic Environment, Political Environment, Technological Environment. The Economic Scenario in Rural India, the rural economic structure, rural occupation pattern and employment structure, income and consumption, rural infrastructure and government policies, sources of rural finance, organised and unorganised sources of finance.
- 2. Rural Consumer Behavior and Marketing Strategies:** Rural Market Segmentation, Targeting, Selection of Segments, Requirement for Effective Segmentation, Coverage of segments, Positioning, Developing a Positioning Strategy. Product Strategies, Pricing Strategies, Distribution Strategies, Promotion Strategies. Factors affecting consumer behavior, characteristics and Psychology of rural consumer. Product, branding and packaging, types of rural channels, selection and management of channels, factors influencing channel decisions, retailing, transportation, warehousing, role of advertising, sales promotion, publicity, and personal selling in rural markets.
- 3. Services Marketing and Strategic Issues:** Service Sector and Economic Growth, Service Concept, Characteristics and Classification of Service, Marketing services Vs. Physical services Challenges in Service Marketing. Segmentation, Differentiation, Positioning: Positioning of Services and Strategies related to Positioning of services.
- 4. Managing Service Quality and Productivity:** Product, Price, Place, Promotion, People, Physical Evidences and Process Decisions. Service Management Process; Internal, External and Interactive Marketing Strategies. Concept, Dimensions and Process; Service Quality Models (Gronroos and Parsuraman) Application and Limitations, Productivity in Services.
- 5. Marketing of Products** Components of Marketing Functions, Packaging, Packing,, Types of Materials for Packing, Marketing of Seeds, Manure, Fertilizers, Pesticides, Feeds for Live Stock, Farming Equipments and Chemicals. Role of Innovations in rural markets, Importance of ICT in rural. Cooperative Marketing and Emergence of Organized Retailing in rural markets. Marketing of Financial, Hospitality, Health, Educational and Professional Services, Marketing for Non-Profit Organizations and NGOs.

MBA 4100: SUPPLY CHAIN MANAGEMENT

PERIOD PER WEEK			CREDITS			MAXIMUM MARKS				
						THEORY		PRACTICAL		TOTAL MARKS
T	P	Tu	CW	SW	Tu	CW	End Sem	SW	End Sem	
4	-	-	3	-	-	30	70	-	-	100

COURSE OBJECTIVE: This course introduces the concept of supply chain management. Students will gain a sound foundation in the knowledge necessary in the field of supply chain management.. It includes benefits and limitations of E-Business and outsourcing in SCM.

COURSE OUTCOMES:

At the end of the semester, the students will be able to:

1. Understand the important role, decision making, and drivers of supply chain management in modern business context.
2. Identify and assess the need & choices of distribution channels, forecasting models, and revers logistics.
3. Evaluate and apply the tools of supply and demand management, level of product availability and planning for outsourcing in supply chain.
4. Understand the applications of the fundamentals, issues, and remedial measures in retail SCM.

COURSE ASSESSMENT:

Students will be assessed on the basis of following-

1. Continuous assessment in the form of two mid-term tests, class attendance- regularity, quiz, and assignments/presentations (30%)
2. An end-term theory examination (70%).

MBA 4100: SUPPLY CHAIN MANAGEMENT

COURSE CONTENTS

- 1. Introduction:** Importance of Supply Chain Management (SCM), Definitions of SCM, Decision Phases in supply chain, Process view of a supply chain, Nature and Scope of SCM, Evolution of SCM, Achieving strategic fit, Supply chain drivers, Measures for SCM performance, Balanced Scorecard, Concept of Efficient and Responsive supply chain, Factors for selection of degree of responsiveness and efficiency.
- 2. SCM Matrices & Design of SCM network.** Supply Chain Network Design, The Problem of Network Configurations, Integrated Supply Chain Planning, Supply Chain Network Design Process, Design of Channel of Distributions, Functions of Distribution Channels, Types of Distribution Channels, The Maximal Flow Problem and Product Mix Model. Demand Management and Customer Service: Demand Forecasting, Role of Forecasting in Supply Chain, Corporate Planning Forecasting and Replenishment (CPFR), Reverse supply chain: benefits, forms of reverse SC, implementation steps.
- 3. Production Planning in Supply Chain:** Aggregate Planning Strategies, Planning Supply and Demand in a supply chain, Planning for optimal level of Product Availability, . Outsourcing: Criteria, Importance and limitations, Sourcing/Source Management, Selection of sources. Inventory: Components, Methods for optimum inventory.

MBA 4100: SUPPLY CHAIN MANAGEMENT

PERIOD PER WEEK			CREDITS			MAXIMUM MARKS				
						THEORY		PRACTICAL		TOTAL MARKS
T	P	Tu	CW	SW	Tu	CW	End Sem	SW	End Sem	
4	-	-	3	-	-	30	70	-	-	100

COURSE OBJECTIVE: This course introduces the concept of supply chain management. Students will gain a sound foundation in the knowledge necessary in the field of supply chain management.. It includes benefits and limitations of E-Business and outsourcing in SCM.

COURSE OUTCOMES:

At the end of the semester, the students will be able to:

1. Understand the important role, decision making, and drivers of supply chain management in modern business context.
2. Identify and assess the need & choices of distribution channels, forecasting models, and revers logistics.
3. Evaluate and apply the tools of supply and demand management, level of product availability and planning for outsourcing in supply chain.
4. Understand the applications of the fundamentals, issues, and remedial measures in retail SCM.

COURSE ASSESSMENT:

Students will be assessed on the basis of following-

1. Continuous assessment in the form of two mid-term tests, class attendance- regularity, quiz, and assignments/presentations (30%)
2. An end-term theory examination (70%).

MBA 4100: SUPPLY CHAIN MANAGEMENT

COURSE CONTENTS

- 1. Introduction:** Importance of Supply Chain Management (SCM), Definitions of SCM, Decision Phases in supply chain, Process view of a supply chain, Nature and Scope of SCM, Evolution of SCM, Achieving strategic fit, Supply chain drivers, Measures for SCM performance, Balanced Scorecard, Concept of Efficient and Responsive supply chain, Factors for selection of degree of responsiveness and efficiency.
- 2. SCM Matrices & Design of SCM network.** Supply Chain Network Design, The Problem of Network Configurations, Integrated Supply Chain Planning, Supply Chain Network Design Process, Design of Channel of Distributions, Functions of Distribution Channels, Types of Distribution Channels, The Maximal Flow Problem and Product Mix Model. Demand Management and Customer Service: Demand Forecasting, Role of Forecasting in Supply Chain, Corporate Planning Forecasting and Replenishment (CPFR), Reverse supply chain: benefits, forms of reverse SC, implementation steps.
- 3. Production Planning in Supply Chain:** Aggregate Planning Strategies, Planning Supply and Demand in a supply chain, Planning for optimal level of Product Availability, . Outsourcing: Criteria, Importance and limitations, Sourcing/Source Management, Selection of sources. Inventory: Components, Methods for optimum inventory.
- 4. Coordination and IT in SCM:** Supply Coordination, Obstacles to Coordination in a Supply Chain, Bullwhip effect and its remedial measures, Managerial Levers to Achieve Coordination within a supply chain, Building Strategic Partnership and Trust within an Enterprise Resource Planning Systems,
- 5. Retail SCM:** Introduction, Retail supply chain, difference with manufacturing supply chain, scope, elements, merchandise management processes, and strategic view of Retail SCM, Retail product life cycle management, Retail distribution and replenishment, Retail supplier relationship management, Retail CRM, Category and Format specific retail SCM issues.

MBA 4705: LOGISTICS MANAGEMENT

PERIOD PER WEEK			CREDITS			MAXIMUM MARKS				
						THEORY		PRACTICAL		TOTAL MARKS
T	P	Tu	CW	SW	Tu	CW	End Sem	SW	End Sem	
4	-	-	3	-	-	30	70	-	-	100

COURSE OBJECTIVE: The course is designed to equip the students with the concepts of Logistics and its application in increasing responsiveness and efficiency in supply chain.

COURSE OUTCOMES: At the end of the semester, the students will be able to:

1. Understand the basic fundamentals of logistics management.
2. Identify and design distribution network by adopting various modes of distribution.
3. Use the principles of warehousing and transportation to achieve operational effectiveness.
4. Develop and adopt various modern concepts in logistics outsourcing and inventory management.

COURSE ASSESSMENT:

Students will be assessed on the basis of following-

1. Continuous assessment in the form of two mid-term tests, class attendance- regularity, quiz, and assignments/presentations (30%)
2. An end-term theory examination (70%).

MBA 4705: LOGISTICS MANAGEMENT

COURSE CONTENTS

- 1. Introduction to Logistics:** Definition of Logistics, Role in the economy and in the firm, Components and requirements, Significance of Logistics drivers of supply chain. Their impact on efficiency and responsiveness. Types of Locations, decision criteria and strategies.
- 2. Distribution Logistics:** significance and importance of distribution logistics. Modes of distribution. Decision aspects in levels of distribution network. Design of distribution network.
- 3. Warehousing and Transportation:** Selecting number of warehouse. Designing warehouse. Maintenance and record keeping at warehousing. Role of IT in warehousing. Ownership and designing warehouse. Transportation: Modes of Transportation. Selection of mode of transportation and its significance in Supply Chain. International Logistics. Inbound and Outbound Logistics. Vehicle Scheduling and Planning. Intermodal Transportation.
- 4. Inventory:** Selective Inventory control techniques and their applications. Basic and advances models of EOQ. Selection of batch size. Cost aspects in Inventory. Types of inventory. Safety Stock and Buffer stock: Computation of safety stock and buffer stock. Methods of reducing stock. Just in Time concept, JIT Scheduling and its requirement. Concept of Lean Supply Chain.
- 5. Logistics Outsourcing:** The benefits and pitfalls of Logistic outsourcing. Factors influencing the outsourcing decision. The techniques and contract management of Logistic outsourcing. Customer service logistics. Advancement in Logistics: Third Party Logistics: Functions, Significance, and Future scope. Cross Docking, Lean Logistics, Reverse Logistics, Green Logistics, Case studies.

MBA 4706: ADVANCES IN OPERATIONS MANAGEMENT

PERIOD PER WEEK			CREDITS			MAXIMUM MARKS				
						THEORY		PRACTICAL		TOTAL MARKS
T	P	Tu	CW	SW	Tu	CW	End Sem	SW	End Sem	
4	-	-	3	-	-	30	70	-	-	100

COURSE OBJECTIVE: The objective of this course is to provide students with tools and techniques to manage operations of service organizations.

COURSE OUTCOMES:

At the end of the semester, the students will be able to:

1. Emphasize the significance of service sector in modern economic environment.
2. Classify services for strategic insights and identify innovations in services.
3. Explain and analyze the service encounter model, service facility location, and customer service orientation.
4. Recognize and apply the tools of service quality as well as suggest the strategies for managing demand.

COURSE ASSESSMENT:

Students will be assessed on the basis of following-

1. Continuous assessment in the form of two mid-term tests, class attendance- regularity, quiz, and assignments/presentations (30%)
2. An end-term theory examination (70%).

MBA 4706: ADVANCES IN OPERATIONS MANAGEMENT

COURSE CONTENTS

- 1. Role of services in an economy:** economic evolution, stages of economic society, post industrial society; nature of service sector, role of service manager. The nature of services : services classification
- 2. Service strategy:** the strategic service concept, classifying services for strategic insights, understanding the competitive environment of services, competitive service strategic, winning customers in the marketplace. Services and information technology, technological innovations in services, the competitive role of information in services, the virtual value chain limits in the use of information.
- 3. The service encounter:** the service encounter triad- Encounter dominated by the service organization, the service organization- culture, empowerment; contact personnel – selection, training; the customer- expectation and attitudes, the customer as co-producer; creating a customer service orientation, the service profit chain. service facility location: location considerations, estimation of geographic demand, facility location techniques, site considerations, breaking the rules-competitive clustering, saturation marketing, intermediaries, substitution of communication for transportation.
- 4. Service quality:** defining service quality, measuring service quality- SERQUAL, benchmarking, scope of service quality; quality service by design-incorporating quality in the service package, Taguchi methods, Poka Yoke, quality function deployment; achieving service quality- cost of quality, tools for achieving service quality; programs for service quality assurance – quality improvement to achieve zero defects. Managing queues: queuing systems, the psychology waiting, the economics of waiting essential features of queuing systems standard M/M/1 model, finite-queue M/M/1 model M/G/1 model.
- 5. Managing capacity and demand:** strategies for managing demand- partitioning demand, promoting off-peak demand, developing complementary services, using reservation systems and handling the overbooking problem; Strategies for managing supply- using daily work shift scheduling, using weekly work shift scheduling with days off constraints, increasing customer participation, creating adjustable capacity, sharing capacity, cross training employees, using part time employees. Case Studies with special inference to Indian context.

MB : TECHNOLOGY MANAGEMENT

PERIOD PER WEEK			CREDITS			MAXIMUM MARKS				
						THEORY		PRACTICAL		TOTAL MARKS
T	P	Tu	CW	SW	Tu	CW	End Sem	SW	End Sem	
4	-	-	3	-	-	30	70	-	-	100

COURSE OBJECTIVE: Objective of this course is provide the students exposure to the concepts of technology management, and technology management issues like technology development, acquisition, absorption, diffusion and technology support systems.

COURSE OUTCOMES:

At the end of the semester, the students will be able to:

1. Understand the basic fundamentals, importance, benefits, and issues in technology management.
2. Explain the concepts in technology development, acquisition, and innovation.
3. Emphasize the benefits of technology absorption and diffusion.
4. Plan the process of technology transfer and protection.

COURSE ASSESSMENT:

Students will be assessed on the basis of following-

1. Continuous assessment in the form of two mid-term tests, class attendance- regularity, quiz, and assignments/presentations (30%)
2. An end-term theory examination (70%).

MB _____ : TECHNOLOGY MANAGEMENT

COURSE CONTENTS

- 1. Technology Issue and Implications:** Concepts and Definition, Aspects and Issues, Technology Change: Implication.
- 2. Technology Development and Acquisition:** Forecasting, Identifying Technological Change, Generation and Development and Technology Transfer. **Technology Innovation:** Basics of innovation, mistake proofing, Sources of Innovation, Types and Patterns of Innovation, Human side in innovation, Role of innovation in the macro environment.
- 3. Technology Absorption and Diffusion:** Absorption: Accommodate and Manage Technological Change, Evaluation and Assessment and Diffusion.
- 4. Process of Outsourcing Technology.** The terms and conditions of technology transfer. Pre-requisites of successful technology transfer. **Technology Protection:** Advantages and disadvantages of Intellectual Property and Patents
- 5. Technology Environment:** Science and Technology in India, Policies, Linkages. **Technology Support Systems:** Financing, Information Systems, Organization at Enterprise Level. Case Studies

MB : ENTERPRISE RESOURCE PLANNING

PERIOD PER WEEK			CREDITS			MAXIMUM MARKS				
						THEORY		PRACTICAL		TOTAL MARKS
T	P	Tu	CW	SW	Tu	CW	End Sem	SW	End Sem	
4	-	-	3	-	-	30	70	-	-	100

COURSE OBJECTIVE: To provide the knowledge and skills required to identify the issues associated with the deployment of an Enterprise Resource Planning system, and to master the steps necessary for a successful ERP implementation.

COURSE OUTCOMES:

At the end of the semester, the students will be able to:

1. Comprehend the basic concepts of ERP systems for manufacturing & service companies, and the differences among MRP, MRP II, and ERP systems.
2. Apply the principles of ERP systems, their major components, and the relationships among these components.
3. Map various business processes using ERP modules and techniques.
4. Identify and suggest the advantages and limitations of implementing ERP systems.

COURSE ASSESSMENT:

Students will be assessed on the basis of following-

1. Continuous assessment in the form of two mid-term tests, class attendance- regularity, quiz, and assignments/presentations (30%)
2. An end-term theory examination (70%).

MB _____ : ENTERPRISE RESOURCE PLANNING

COURSE CONTENTS

- 1. Introduction to Enterprise Resource Planning (ERP)** system, its origin, need, significance, current trends, and overview of functionality.
- 2. Evolutionary stages of ERP**, Variety accommodation, Strategic and operational issues in ERP, Integrated and Business model of ERP, Zachmann enterprise architecture, MRP and MRP-II.
- 3. Review of business processes and integration across various functions**, How an ERP can provide benefits for the enterprise, planning for an ERP deployment, Planning and executing the selection process for an ERP system, according to the identified requirements
- 4. ERP modules:** Production Planning, Sales and Distribution, Materials Management, Plant Maintenance, Quality Management, Project Management, Financial Management and Costing, and Human Resources, Issues in customizing ERP system, top management concern about ERP, IT infrastructure for ERP, E-commerce framework, applications and security for ERP.
- 5. ERP Implementation Steps**, ERP Implementation Methodology, End user training, Post Implementation, Constraints in ERP Implementation and role of consultant, users and vendor in the process of implementation. Exposure to main commercial and open source ERP packages available on internet i.e. SAP, BANN etc. Case Studies on ERP.
